Claims

English Abstract

...glass units, and other substrates. In some embodiments, the protective
covering comprises a plurality of **strips** of masking material. In some
embodiments, the protective covering (which may take the form of a single
masking sheet or of multiple masking **strips**) is sized, shaped, and
positioned such that an oversized masked portion of a pane surface...

Detailed Description

... over a major portion of its first surface. The protective covering
comprises a plurality of **strips** of masking material. If so desired, the
masking material may be transparent.

In another embodiment...the substrate typically has two generally-opposed
major surfaces, which preferably are planar and substantially **parallel**
to each other. In most cases, the substrate will be a sheet of

multiple **strips** of masking ...The method of figure 10 also includes the step of determining an optimal number of **strips** . As described above, for a small monolithic pane or IG unit, the optimal number of **strips** may be one. For other panes and IG units, multiple **strips** may be desired. The method of figure 10 also includes the step of calculating a masking **overlap** dimension D. The width of the masking material and the optimal number of **strips** may be used to calculate useful **overlap** dimensions D to achieve the desired coverage of the masked area.

The method figure 10 also includes the step of applying the optimal number of **strips** . For example, the optimal number of **strips** of masking material may be applied to a first, outer surface of a monolithic pane or IG unit. In one method in accordance with the present invention, the **strips** are applied in a sequential fashion with each subsequent strip partially **overlapping** the preceding strip by the calculated masking **overlap** dimension D. It is to be appreciated that various embodiments of a window assembly may ...

Claim

... over a major portion of said first surface, the protective covering comprising a plurality of **strips** of masking material.

2 The transparent pane of claim 1 wherein the masking material is transparent.

3 The transparent pane of claim 1 wherein said **strips** of masking material are disposed in a sequentially **overlapping** fashion with each subsequent strip **overlapping** a portion of a preceding strip.

4 The transparent pane of claim 3 wherein said **strips** of masking material extend substantially in **parallel** across the first surface of the pane.

5 . The transparent pane of claim 1 wherein...16 The transparent pane of claim 13 wherein the protective covering comprises a plurality of **strips** of masking material.

17 The transparent pane of claim 13 wherein said protective covering is ...a width along all sides of said first surface that is significantly less than an **overlap** distance by which confronting surfaces of the frame extend over said first surface when the...46 The transparent pane of claim 34 wherein the protective covering comprises a plurality of **strips** of masking material.

47 The transparent pane of claim 34 wherein the pane is part...54 The glazing assembly of claim 48 wherein the protective covering comprises a plurality of **strips** of masking

Overlapping strips applying apparatus for multi- pane insulating glass unit assembly, has linear actuators to position tail of substrate so that adhesive side adheres to workups

Abstract (Basic):

... A work head provides a **substrate** (132) with an adhesive (134) on its surface (106A). Linear actuators are used to position the tail of the **substrate** such that the adhesive side of **substrate** is adhered to the workpiece (102) with an unmasked apron (124) of the workpiece extending...

... For applying **overlapping strips** during **masking** multi-
pane insulating glass unit assembly used for **windows** of buildings
...

...The amount of heat transfer through **windows** is reduced by suitably positioning the **substrate** with adhesive...

...The figure shows a perspective view of an assembly of multi- **pane insulating glass** unit...

... glass pane (102...
... substrate surface (106A...
...outer periphery of pane (128...

Publisher: ELSEVIER SCIENCE BV, PO BOX 211, 1000 AE AMSTERDAM, NETHERLANDS

Language: English Document Type: ARTICLE (ABSTRACT AVAILABLE)

...Abstract: resolving photoelectron spectroscopy. Iron(1 1 0), epitaxially grown on a W(1 1 0) **crystal**, served as the ferromagnetic **substrate**. Exchange splittings of the O 2p(x) derived level were detected demonstrating a magnetic coupling...

...of the exciting radiation, and detection angle of the emitted photoelectrons pointing to a k(**parallel** to)-dependent exchange splitting. High oxygen exposures lead to a FeO overlayer at the surface

...Identifiers--POLARIZED ELECTRON-DIFFRACTION; SURFACE MAGNETISM; FERROMAGNETIC SURFACES; INVERSE PHOTOEMISSION; CURIE-TEMPERATURE;

INITIAL-OXIDATION; HYSTERESIS CURVES; COVERED $\text{Fe}(110)$; INDUCED BANDS
